

R350 RESCUE SYSTEMS

The Rollgliss™ R350 system provides efficient hauling, but more importantly, very controlled lowering (a finger and thumb are all that is required to hold a load). This system also allows you to change the hauling ratios on the fly with quick release pulleys, allowing custom rigging for different applications and jobsites.

- Includes everything you'll need for efficient rescue.
- Rope retention bar does not allow rope to twist or overlap.
- Visual and audible function controls.
- Static kernmantle rope for optimum performance.
- Quick connect system allows fast insertion of various pulleys.
